

# **SATELLITE DISH GUIDELINES**

- 
- 1) It is preferable that the satellite dish be installed on the rear of the home or within five feet (5') of the rear of the home for satellite dishes mounted on the side walls or roofs if acceptable signal can be received.
  - 2) The satellite dish should be installed no closer to the front of the home than the electric meter located on the side of the home.
  - 3) No visible wiring is permitted except at the base of the satellite dish. All other wiring must be installed within attic areas, or within the structure of the home.
